

MANUFACTURING & TESTING FACILITIES

Since 1889, nyb has been manufacturing quality American made industrial centrifugal, axial and custom fans. Over the past few decades, we have been rapidly expanding manufacturing and testing facilities.

1 1918

The main plant La Porte plant is purchased by nyb. It has been expanded over nine times.

2 2001

The Effingham facility is purchased to manufacture cataloged centrifugal fans.

3 2012

Manufacturing of centrifugal and axial fans expands to a facility in Leitchfield.

4 2015

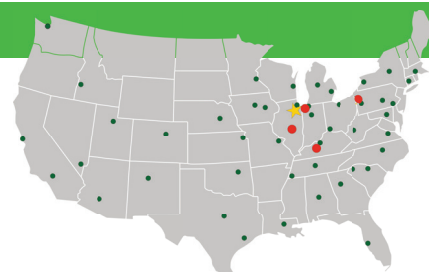

The lab was expanded to include six airflow test chambers and two reverberant sound rooms, making it the largest AMCA accredited lab in the United States.

5 2017

New Castle capacity increased when a new building is constructed next to the current building. These facilities manufacture large-scale, custom fans and replacement components.

Total: 558,000 ft²
